Espresso is a small, intense coffee beverage. While delicious alone, espresso coffee is often combined with milk or other ingredients to create other popular drinks.

Adding a small amount of milk foam to mark the top of the espresso produces an espresso macchiato. Adding more milk and milk foam results in a cappuccino. A drink the same size as a cappuccino but with less foam and more milk is a caffè latté.

The same amount of coffee is in each of these drinks, but the flavor becomes milder as more milk is added.
